Clinara buy-and-build strategy — Board paper, March 2026 (fictional)

Agreed strategy: acquire two to three specialist clinic software businesses a year in adjacent verticals (veterinary, physiotherapy, dental, optometry), integrate them onto the Clinara platform and grow through cross-selling payments and patient engagement modules.
Investment criteria: £2m–£10m ARR, recurring revenue above 85%, overlapping customer profile (independent and group clinics).
Value creation: cross-selling Clinara Pay and Engage to acquired customers; hosting and tooling consolidation savings.
Integration approach: full integration by default; partial integration where the acquired brand is strong in its vertical.
